

**James Smith v. Mrs. Mary Smith**

**Executive Summary**

H's Monthly Income-3 Year Average	\$40,694	See Exhibit M
Less Estimated FICA Taxes	(1,178)	
Less Estimated Federal Taxes	(6,531)	16.0% Effective Rate
<b>Less Child Support Obligation</b>	<b>(3,200)</b>	
<b>Less W's Alimony Need</b>	<b>(7,000)</b>	H receives a tax deduction for this which has reduced taxes above
Less Additional Child Expenses Proposed	<u>(4,220)</u>	See Exhibit L; also see #11 below
Remaining for Other Personal & Discretionary Expenses	18,566	
Less Monthly Mortgages	(4,273)	See Exhibit L
Less Monthly Housing & Furnishings	(2,396)	See Exhibit L
Less Monthly Transportation	(598)	See Exhibit L
Less Monthly Personal	<u>(5,891)</u>	See Exhibit L
<b>Surplus for Discretionary Expenses and Savings</b>	<b><u>\$5,408</u></b>	

**Major Assumptions & Conclusions**

1	Conclusion	W should receive 54% of the net marital estate and H 46%. These values will change as the financial account balances are updated.																		
2	Conclusion	After calculating the returns on distributed assets, estimated incomes and expenditures, and considering the family's standard of living during marriage and H's post-marriage, W has an alimony Need of \$12,000 per month for 10 years, then \$7,000 per month for 16 years; 26 years is H's remaining worklife expectancy. H has the ability to pay per my analysis and will accumulate a substantially larger estate than W over his remaining life expectancy, even assuming H has no income increases for the remainder of his career.																		
3	Assumption	<table border="0" style="margin-left: auto; margin-right: auto;"> <tr> <td colspan="2">H = Husband</td> <td>Life</td> <td colspan="2">W = Wife</td> <td>Life</td> </tr> <tr> <td><u>DOB</u></td> <td><u>Age</u></td> <td><u>Expectancy</u></td> <td><u>DOB</u></td> <td><u>Age</u></td> <td><u>Expectancy</u></td> </tr> <tr> <td>10/15/71</td> <td>43.1</td> <td>37</td> <td>9/10/71</td> <td>43.2</td> <td>41</td> </tr> </table>	H = Husband		Life	W = Wife		Life	<u>DOB</u>	<u>Age</u>	<u>Expectancy</u>	<u>DOB</u>	<u>Age</u>	<u>Expectancy</u>	10/15/71	43.1	37	9/10/71	43.2	41
H = Husband		Life	W = Wife		Life															
<u>DOB</u>	<u>Age</u>	<u>Expectancy</u>	<u>DOB</u>	<u>Age</u>	<u>Expectancy</u>															
10/15/71	43.1	37	9/10/71	43.2	41															
4	Assumption	W is assumed to be unable to gain employment due to her medical condition.																		
5	Assumption	Daughter's DOB is 6/4/99; Son's DOB is 2/15/06.																		
6	Assumption	W will continue to live at Marital Residence and will refinance at a 3.25% rate for 15 years; H will purchase a \$400,000 house with an \$80,000 down payment and a mortgage at 3.25% for 15 years.																		
7	Assumption	H contributes \$16,500 annually to his retirement plan until age 50, when he contributes \$22,000 to his retirement plan until age 66. According to H's Answers to Interrog., a total of \$44,000 per year is contributed to his retirement, which means MSPS contributes \$27,500. Even with a 50% 401(k) split, H will have the ability to draw over \$350,000 per year upon retirement for his remaining statistical life expectancy.																		
8	Assumption	H's employer matches 3% of H's contribution to his retirement each year while H works.																		
9	Assumption	H will draw maximum Social Security at age 67 of \$2,533 per month and W will receive the divorced spouse benefit of 1/2 that amount.																		
10	Assumption	H's expenses come from H's Answers to Interrog. Many of the listed expenses in the Answers are business expenses deducted by his business before the quarterly bonus is paid, thus are not listed as personal expenses in Exhibit L. The analyst also added certain expenses that H did not include that are typical of persons at the assumed income level.																		
11	Assumption	The analysis assumes that H will bear the cost of all remaining private school tuition estimated to be \$3,200 per month and will contribute to a 529 plan for college estimated to be \$250 per month. H will also pay for swim team direct costs and school costs and camps estimated to be \$420 and \$350 per month, respectively.																		
12	Assumption	Child support assumed to be the maximum per child of \$3,200 and \$2,100 for 2 and 1 child, respectively.																		
13	Assumption	W is assumed to sell the her parent's house after 15 years and incur 20% capital gains tax. Proceeds will be reinvested.																		
14	Assumption	W should receive the ownership and be the beneficiary of the term life insurance policy which is currently a \$1.5m face amount. The face should be increased to at least \$3.0m to cover W's risk of losing the alimony.
